

They Come To America

a film by

Dennis Michael Lynch

Dennis Michael Lynch has often been seen on Fox News and other programs. He is neither Republican or Democrat but a citizen who decided to explore illegal immigration. He drove all over the nation investigating who these people are and how it impacts our nation.

He meets many of our citizens who can't get jobs because they are being undercut in wages, others who can't be employed because they don't speak Spanish. He travels to the southern border and interviews ranchers and watches them defend themselves from drug smugglers.

How does this impact our economy, schools and safety? Politicians are challenged, compassion is shown and the cost is counted with this hard-hitting view of illegal immigration.

This is a film that many will not want you to see. Decisions concerning immigration will soon be made by our politicians.

- We need to be informed.
- We need to inform our neighbors.
- We need to contact our Representatives, Senators and President.
